

Ruthvik Reddy Veerannagari

Hyderabad, India | +91 9014346193 | ruthvikreddyv@gmail.com | [Linkedin](#) | [Github](#)

TECHNICAL SKILLS

Languages Python, C/C++, SQL

Backend Django, FastAPI, REST API design, OTP authentication, session management

Frontend Next.js, HTML5, CSS3, Bootstrap

Blockchain Ethereum, Solidity, Hardhat, Ethers.js, IPFS, SHA-256 hashing

AI / ML NLP, Computer Vision, Semantic Scene Generation, Pandas, NumPy, Matplotlib

XR / AR AR/XR Frameworks, 3D Scene Graph Generation, Adaptive Learning Systems

Database PostgreSQL — Schema design, Query optimisation, Relational modelling

PROFESSIONAL EXPERIENCE

Software Developer Intern — Cypwng, LendFundz Fintech Platform, Hyderabad

Jan 2025 – Jun 2025

- Architected loan lifecycle modules covering intake, underwriting transitions, and status tracking in Django/PostgreSQL, reducing manual operations overhead across the credit team.
- Delivered OTP-based two-factor authentication and role-scoped session management, satisfying fintech security and audit requirements for production deployment.
- Designed a versioned REST API layer for the Next.js frontend using contract-first development, enabling fully parallel frontend and backend delivery cycles.
- Rebuilt EMI computation as an isolated, parameterised utility library, improving numerical fidelity and reducing regression risk across variable tenures and rate structures.

Research Intern — IIIT Naya Raipur

Jan 2026 – Present

- Constructed end-to-end ML pipelines covering ingestion, preprocessing, feature engineering, and cross-validated model training on structured research datasets under faculty supervision.
- Drove systematic hyperparameter optimisation cycles with measurable generalisation gains; findings contributed to two manuscripts under review at indexed international venues.

PUBLICATIONS (UNDER REVIEW)

[1] Ruthvik Reddy Veerannagari, “EduChain: A Blockchain-Based Framework for Decentralised Academic Credential Verification,” *International Journal of Information Technology (IJIT)*, 2026.

TECHNICAL PROJECTS

ArchViz-XR | AI-Powered XR Framework for Scientific Knowledge Visualization

- Designed an automated *semantic-to-spatial XR compilation pipeline* that ingests research paper diagrams, extracts entity relationships via NLP and computer vision, constructs scene graphs, and renders interactive 3D AR experiences, eliminating all manual AR content authoring.
- Prototyped Transformer architecture visualisation: users scan a diagram and explore animated component flows, AI-generated explanations, voice interaction, and adaptive learning overlays in real time.

EduChain | Decentralised Academic Credential Verification Platform

- Deployed permissioned Ethereum smart contracts for on-chain credential issuance and revocation; integrated IPFS with SHA-256 hashing, making post-issuance tampering cryptographically detectable.
- Exposed a FastAPI verification service and wallet-authenticated Next.js interface via Ethers.js, enabling trustless credential verification without a centralised intermediary.

LendFundz | Financial Management System | ParkEase | Real-Time Parking Allocation

- LendFundz: normalised PostgreSQL schema for loan applications, amortisation-accurate repayment schedules, and privilege-segregated access across borrower, reviewer, and admin roles.
- ParkEase: backend locking strategy for concurrent slot reservations eliminating double-booking; real-time availability tracking maintains correctness under simultaneous request loads.

Mental Health Detector | Journal Sentiment Analysis Application

- Built a supervised text classification pipeline over journal entries with Matplotlib mood-trajectory dashboards for longitudinal behavioural pattern analysis.

EDUCATION

B.Tech (Honours) in Computer Science Engineering (Data Science)

2022 – 2026

Chhattisgarh Swami Vivekanand Technical University, Bhilai

CERTIFICATIONS

- Machine Learning with Python — IBM
- AI & Azure AI Fundamentals — Microsoft
- Generative AI Essentials — LinkedIn & Microsoft
- Advanced Software Engineering — Walmart
- Data Analytics Simulations — Accenture & Deloitte
- Software Engineering Simulation — Wells Fargo
